

ADULT FITNESS TAX CREDIT.CA

Extending the popular and well received federal Children's Fitness Tax Credit to include all Canadians would save The Government of Canada \$2.5 billion in health care costs alone. 2 in 3 Canadian adults support the tax credit.

More than, one million Canadians could become active by allowing individuals to claim up to \$500 dollars per adult when enrolled in eligible sport and physical activity programs.

If you agree with this initiative, please visit:
